

**ZENITH  
CUTTER**

A DIVISION OF FISHER BARTON

## Corrugated Slotting Solutions

# WOLVERINE™

Wolverine is the male slot knife from Zenith Cutter, featuring engineered serrations designed specifically for “over-recycled” corrugate. Wolverine blades cut better\* and last longer than any other male slot knife on the planet.

## CLEANER CUTS AND LESS DUST. UP TO 24% LESS DUST

Wolverine blades cut better and last longer than any other male slot knife on the planet. The result is cleaner cuts, less dust and a safer work environment. In fact, a recent test\* showed Wolverine produced 24% less dust than the competition.

THE BLADES THAT DON'T MESS AROUND!

24% Less  
Dust

**WOLVERINE™**

Competitor A

# Clean Cuts.

Competitor A

Competitor B

Wolverine

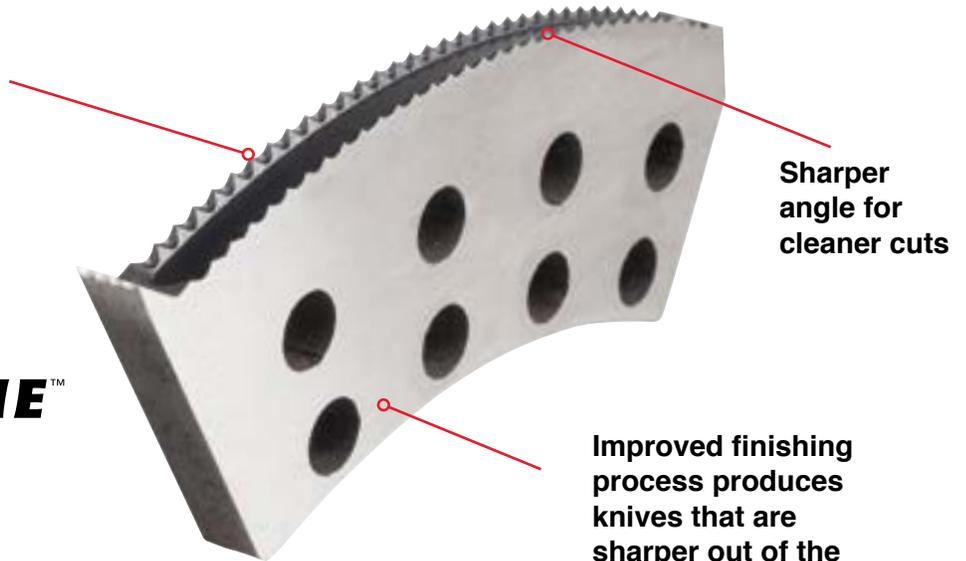

# Patented Design

Durable male slot knives by Zenith Cutter are made from select high-chrome, high-carbon tool steel. Built for long service life, our male slot knives are precision ground to assure true-clean cuts over extended production runs. Our full corrugated line includes slitter blades, male slot knives, female slot knives and cut-off knives – all designed and machined to put more precision and longevity in your corrugated board production line.

Twice as many teeth for improved cut on corrugated with high recycled content

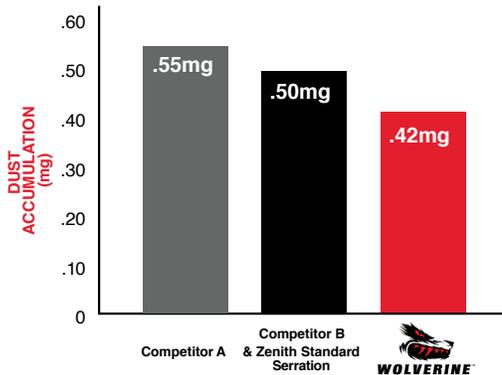

**WOLVERINE™**

Sharper angle for cleaner cuts

Improved finishing process produces knives that are sharper out of the box

Patent #'s: D791,205; D791,206

# Competitive Edge

- 24% less dust than Competitor A
- 16% less dust than Competitor B & Zenith standard serration

\* Based on 100 minutes of runtime, equal quantity of boxes
