

Zenith Cutter - Roofing Knives

Steel, Carbide, and Rubber Knives

Roofing

High-quality, cost-competitive, reliable

Our high-quality laminate shingle knives, architectural shingle knives, strip shingle knives, and shingle shaping knives are all made from the finest tool steel available and custom built to your specifications and application needs. Available at extremely cost-competitive prices, our premium roofing knives deliver measurable savings, and can be used in a variety of roofing applications, from producing laminate or tab shingles, to roll roofing or starter products.

Carbide

Consistent, accurate, and precise

Our products are manufactured using the highest quality tungsten carbide available. We offer an available range of cobalt content blends to meet specific customer needs, and have the ability to provide most shapes and sizes to accommodate customer requirements. Zenith Cutter Co. also provides competitive pricing options, available in house engineering capabilities as well as on location assistance availability.

Rubber

Roofing knives and accessories

Our products ensure the longest usage life, help minimize your business's downtime, and enhance productivity. We work with the leading roofing OEMs to ensure that our products meet the needs of the roofing industry. And, we maintain a large supply of our roofing knives and accessories in our facilities, all of which are available for immediate shipment.
